DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-37 and 48-55, drawn to a work board assembly, classified in class 40, subclass 491.
 - II. Claims 38-47, drawn to a hook assembly, classified in class 248, subclass 339.
 - III. Claims 56-70, drawn to a rail assembly, classified in class 16, subclass 87R.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I., II. and III. are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I. has separate utility such as by itself, without the rail. Invention II. has separate utility such as for mounting something other than a work board. Invention III. has separate utility such as with a work board that lacks a rotating hook. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3611

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
